FITS DIFFERENT KINDS OF BATTERIES BY CHANGING ADAPTERS . . .

- Various batteries work at same time
- Each channel works independently
- Start/Stop any channel by any time
- Fully automatic without any setting
- Start analyzing once battery put on
- Keep data in memory after analyzed
- Charge battery to 80% when finished
- LCD indicating all steps clearly

You need it, if you are:

- **Manufacturer** -- QC & QA dept. in production line.
- **Importer** ----- Check quality of incoming batteries.
- **Retailer** ----- Make sure quality for any complaining.

We are Manufacturer/Exporter

OEMs are Welcome

Instruction In Using TX-06

TBOX - the Battery Pack Analyzer was designed for analyzing capacity of Li-ion battery packs, either for QC in production line or importer.

You may select and change adapters to fit many kinds of batteries including 3.6 / 7.2V.

With intelligent design, it works fully automatically without any setting,

Data shows clearly on LCD to let you know all details in analyzing.

Each channel works independently, can be start/stop each channel freely.

The TX-06 Analyzer works in 3 steps to complete a cycle of each analyzing:

Step 1. Charge the battery to full.

Step 2. Dis-charge battery to get data of capacity.

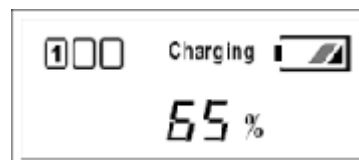

Step 3. Charge battery to around 80% of capacity for keeping stock or shipment.

Start to use easily:

1. Power on the TX-06
2. Insert suitable battery-adapter onto TX-06
3. Place battery pack onto suitable adapters
4. TX-06 start to work automatically

LED Indications :

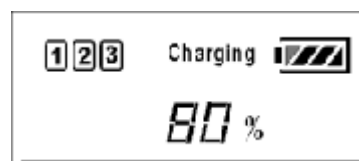

「Fig 1」 :
Working in Step 1 stage,
Charging the battery,
Capacity of battery is now 65%.

「Fig 2」 :
Analyzing in Step 2 stage,
Under dis-charging,
capacity is counted "1030mAh" at the moment.

「Fig 3」
TX-06 working in Step 3,
Charging the battery to normal level of voltage (Capacity)
for keeping stock or shipping to customer.
